

## Suggestions for Spring Cruisin' Car Show Pictures:

1. No people in the car!
2. Please try to select a plain background, like a garage door, driveway, or blue sky. Trees and bushes are difficult to remove. Background should not be the same color as the car.
3. Please try for a minimal amount of shadows on the car finish. These cannot be removed from picture.
4. Photos that do not show all of the car cannot be used. (i.e. photo cuts off tire, bumper, etc.)
5. The higher quality photo the better! Photos emailed directly from a phone or camera are best. Photos that are printed out and then need to be scanned do not come out very well.
6. A shot from the front left and front right is preferred. This gives more versatility for the shirt!
